DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Paraschac US h1745. Paraschac discloses a device for clamping tissue comprising a first and second handle, first and second jaw members, a first elongated electrode (147) and a second elongated electrode (148).

Response to Arguments

Applicant's arguments filed 1/4/2005 have been fully considered but they are not persuasive. Applicant argues that Paraschac does not disclose electrodes that are narrower than the clamping surface of the jaws and activates the electrodes to create a line of ablation between the electrodes, which is substantially narrower than the width of the clamping surface. Applicant also states that Figure 2 of Paraschac does not illustrate a clamping surface that flanks the electrodes as provided by the claims. While Examiner does not agree with the arguments presented regarding Figures 2 and 3 of Paraschac, Examiner will direct Applicants attention to Figure 5 of Paraschac in order to more clearly establish that Paraschac does in fact anticipate the claims. Figure 5 clearly illustrates electrodes (147, 148) that are narrower than the clamping surface (116, 117).
